Omikron Yachts

OT-60

At Omikron Yachts, we believe that enjoying the beauty of cruising at sea and respecting the environment go hand in hand.

Philosophy

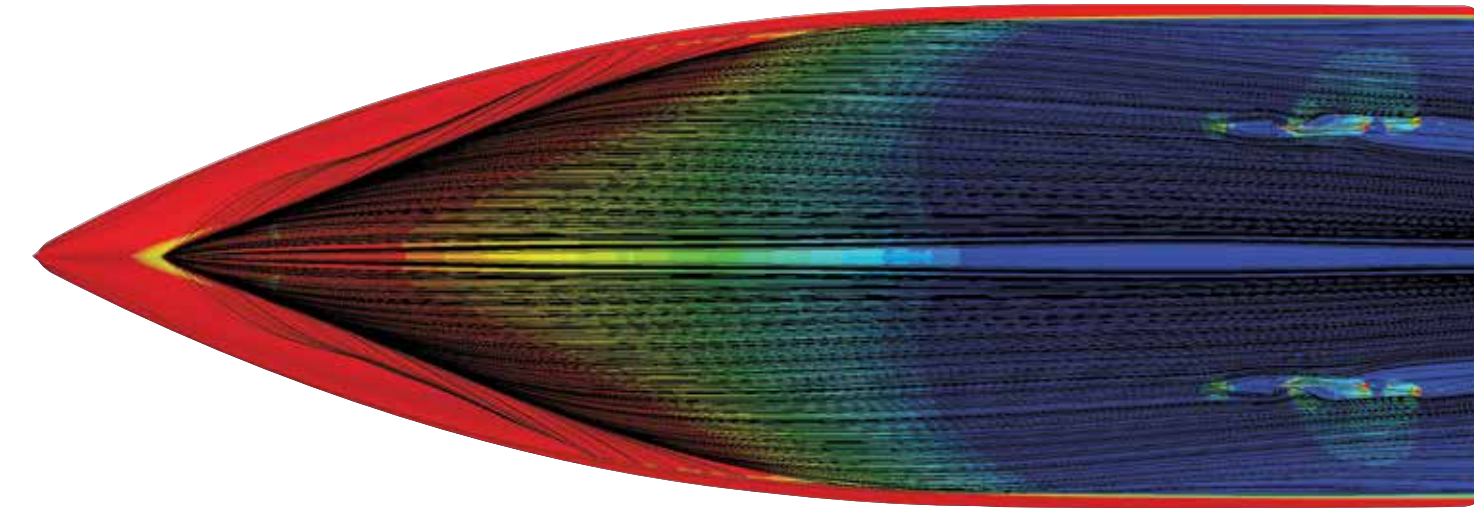

Concept

The Sustainable Navigation

Expressing the belief that progress is seen with an eye to the past as well as the future, the OT60 proposes a simpler vision of sustainability. The perfect combination of the quiet, easygoing lifestyle of sailing and the convenience and space of a power yacht makes the journey as enjoyable as the destination with a very low fuel consumption and in a total quietness.

Efficiency

CFD Figure

DynPressure

"Unlike many other motorboats designed for speed, our priority was not maximum speed. Instead, we optimized fuel efficiency and hull drag for a specific cruising speed that can be adjusted to higher or lower, but the design was tailored to excel around 12 knots. By optimizing the boat for this specific speed range, we could offer a spacious interior without compromising on fuel efficiency."

Juan K.

The quest for Sustainability

At Omikron, we're crafting a vision where luxury and environmental consciousness sail hand in hand. Cruising with 2 to 10 times fewer carbon emissions than its counterparts, this vessel's low fuel consumption opens the door for a future of electric and eco-friendly propulsion. The OT60 is a commitment to a greener, more responsible tomorrow.

Comfort

The supreme seakeeping characteristics of the Juan K-designed hull combined with the spacious and quiet interior makes the journey as enjoyable as the destination.

"Unlike most power boats that emphasize on speed, this boat is designed to be used at a leisurely pace. The concept revolves around the journey itself, rather than the destination, which aligns with the philosophy of sailing boats."

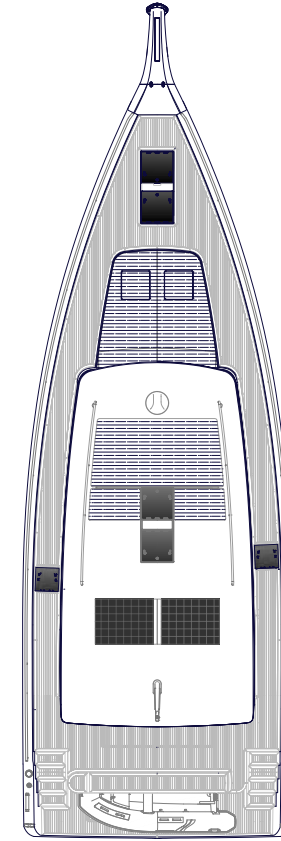

Lorenzo Argento
